AETHRIVO

CONNECT. LEARN. INNOVATE. GROW.

CORPORATE FUNCTIONAL WEBSITE & MEMBER PLATFORM REQUIREMENTS

Revised Product Blueprint for Developers, UI/UX Designers,
Software Architects and Implementation Teams

Project attribute	Specification
Product	Aethrivo integrated professional services, learning and collaboration ecosystem
Tagline	Connect. Learn. Innovate. Grow.
Business model	Free membership for students, faculty and industry; revenue through paid services, programmes and corporate engagements
Operating model	Hybrid: online delivery plus offline institutional and corporate programmes
Market	India-first, with international participation and expansion in phases
Platform	Responsive website, member portal and administration portal; mobile applications in a later phase
Core verticals	Seven: IPR, Academy, Skills, Corporate, Talent, Wellbeing, and MoU & Collaborations
Document status	Revised developer hand-off / functional requirements baseline
Version	2.0 | 9 November 2026

Developer hand-off baseline | Version 2.0 | 9 November 2026

DOCUMENT CONTROL & EXECUTIVE SUMMARY

Project attribute	Specification
Product	Aethrivo integrated professional services, learning and collaboration ecosystem
Tagline	Connect. Learn. Innovate. Grow.
Business model	Free membership for students, faculty and industry; revenue through paid services, programmes and corporate engagements
Operating model	Hybrid: online delivery plus offline institutional and corporate programmes
Market	India-first, with international participation and expansion in phases
Platform	Responsive website, member portal and administration portal; mobile applications in a later phase
Core verticals	Seven: IPR, Academy, Skills, Corporate, Talent, Wellbeing, and MoU & Collaborations
Document status	Revised developer hand-off / functional requirements baseline
Version	2.0 | 9 November 2026

Purpose. This document defines the functional, operational and technical requirements for the Aethrivo corporate website and member platform. It is intended for website developers, UI/UX designers, software architects, implementation teams and business administrators.

Core proposition

Aethrivo is one integrated professional ecosystem connecting students, faculty, experts, trainers, consultants, institutions and industry with professional learning, intellectual property services, business consulting, talent engagement, organisational wellbeing and institutional collaboration.

Business and revenue principles

- Student, faculty and industry membership is free. Other eligible profile types may also register free under the approved membership policy.
- Revenue is generated through paid courses, professional training, institutional programmes, consultancy, corporate contracts, wellbeing assessments, expert assignments and collaboration-management services.
- Online and offline delivery are supported. International users, partners and payments may be enabled in phases.
- All pricing, service scopes, legal terms and commercial policies require owner approval before launch.

1. PRODUCT VISION, OBJECTIVES & SCOPE

1.1 Product vision

Aethrivo will operate as a unified, digitally enabled professional services platform. It will combine free membership, professional learning, IPR services, corporate consulting, organisational wellbeing, expert engagement and institutional/industry collaborations.

1.2 Product objectives

- Build a trusted, searchable network of students, faculty, industry members, trainers, consultants and experts.
- Make free membership simple, useful and accessible on mobile devices.
- Convert member needs into trackable service enquiries, course enrolments, programme registrations and institutional projects.
- Enable qualified experts to publish professional profiles and receive suitable paid assignments, subject to verification and consent.
- Allow institutions and companies to request training, IPR, consulting, wellbeing and partnership services.
- Provide administrators with end-to-end control over members, enquiries, experts, courses, programmes, MoUs, payments and reporting.
- Support online and offline delivery, multiple countries and future mobile applications.

1.3 In-scope product components

Component	Description	Priority
Public website	Brand, about, seven verticals, service catalogue, courses, programmes, contact and enquiry pages	MVP
Membership portal	Registration, verification, member ID, profile and consent	MVP
Member dashboard	Profile, enquiries, courses, programmes, certificates and notifications	MVP
Expert directory	Expert profiles, expertise, verification and availability	MVP basic; marketplace later
Service CRM	Enquiries, assignment, quotation, status and follow-up	MVP
Course/programme management	Catalogue, registration, attendance and certificates	MVP basic
MoU management	Partner enquiry, agreement metadata, activities and renewals	MVP basic
Wellbeing assessment	Configurable surveys and aggregated organisational reports	Phase 2 after validation
Mobile apps	Android/iOS experience using shared backend	Phase 2
Advanced marketplace	Expert matching, scheduling, commissions and payouts	Phase 3

1.4 Out of scope unless separately approved

- Automatic grant of professional qualifications or external certifications.
- Guarantees of patent grants, accreditation, placements or institutional rankings.
- Unsupervised psychological diagnosis or individual employee toxicity labelling.
- Automated legal advice or regulated patent-agent representation.
- Unlicensed copying, hosting or distribution of third-party software, courseware or assessment instruments.

2. USER GROUPS, ROLES & PERMISSIONS

User role	Capabilities	Restrictions / controls
Visitor	Browse public pages, services, courses, programmes and contact details	Cannot view private member data
Student member	Register free, maintain profile, view opportunities, enrol in courses/programmes and submit enquiries	Access only own account and permitted public opportunities
Faculty member	Faculty profile, collaboration interests, trainer interest, courses and programmes	Expert visibility requires consent and verification
Industry member	Organisation/contact profile; request training and consulting; explore talent	Organisation access must be authorised
Expert / trainer	Create professional profile, submit credentials, set expertise and availability, respond to assignments	Publicly marked verified only after approval
Consultant	List services and qualifications; receive suitable leads	Scope, fees and conflicts must be disclosed
Entrepreneur	Maintain professional profile, explore programmes and opportunities, submit service enquiries	Access governed by assigned permissions
Institution account	Manage authorised institutional enquiries, nominated contacts and programme requests	Role-based institutional access
Vertical coordinator	Manage assigned vertical enquiries, offerings, experts and reports	No access to unrelated sensitive data unless authorised
Finance operator	View invoices, payment status, refunds and reconciliation	No access to confidential wellbeing responses
Super administrator	Manage users, roles, content, configuration, audit and system settings	Privileged actions logged; MFA required

2.1 Role-based access

Implement role-based access control (RBAC), with permissions at module and record level. A user may hold more than one role, for example Faculty + Expert or Industry + Institution Contact. Users must not gain additional permissions simply by changing a profile category.

2.2 Verification states

Suggested account states: Draft, Email Pending, Mobile Pending, Submitted, Under Review, Active, Rejected, Suspended and Closed. Expert verification must be tracked separately from general membership approval.

3. WEBSITE INFORMATION ARCHITECTURE

3.1 Public navigation

Main navigation	Suggested sub-pages / tabs
Home	Hero banner, value proposition, featured verticals, upcoming programmes, membership CTA and verified testimonials
About Aethrivo	Vision, mission, values, leadership, team, operating model and contact
Membership	Benefits, categories, eligibility, free membership policy, register, login and FAQs
Our Verticals	Overview of all seven verticals and links to each detail page
IPR	Patents, trademarks, designs, copyright, patent search, IPR training and submit enquiry
Academy	FDP, SDP, MDP, EDP, leadership, communication and institutional training
Skills	Course catalogue, categories, levels, delivery mode, fees and enrolment
Corporate	Corporate training, HR, organisational development, consulting and request proposal
Talent	Become an expert, trainer or consultant; expert directory subject to consent
Wellbeing	Happiness and toxicity assessment, methodology and organisational assessment enquiry
MoU & Collaborations	Partnership types, partner enquiry, implementation services and collaboration examples
Opportunities	Internships, projects, expert assignments, programmes and learning opportunities
Contact	Contact form, support, office details and grievance/privacy contact

3.2 Header and footer

- Header: Aethrivo logo, navigation, search, future language selector, Login and Join Free buttons.
- Footer: About, seven verticals, membership, contact, privacy policy, terms, refund policy, cookie notice, grievance contact and social links.
- Use clear labels and responsive navigation; avoid overcrowding the top menu on mobile.
- All forms and public pages must be accessible by keyboard and screen reader where practicable.

3.3 Global calls to action

- Join Free
- Explore Services
- Become an Expert
- Request Institutional Training
- Submit an IPR Enquiry
- Request a Corporate Proposal
- Propose an MoU
- Register for a Programme

4. MEMBERSHIP REGISTRATION & PROFILE MANAGEMENT

4.1 General membership form

No.	Field	Control / behaviour	Required?
1	Full name	Text; split first/middle/last only if needed for certificates	Yes
2	Date of birth	Date picker; collect only when needed for eligibility or member services	Optional
3	Highest qualification	Dropdown plus Other	Yes
4	Email ID	Email validation and verification link/OTP	Yes
5	Designation	Text or configurable dropdown	Conditional
6	Organisation / Institution	Search or text entry; allow independent / self-employed	Conditional
7	Phone number	Country code + number; OTP verification	Yes
8	Domain expertise	Multi-select from Aethrivo categories plus Other free text	Yes
9	Country	Searchable country dropdown	Yes
10	Citizenship / nationality	Separate from country of residence; collect only if justified	Optional

4.2 Additional recommended fields

Field	Purpose	Rule
Membership category	Student, Faculty, Industry, Expert, Trainer, Consultant, Entrepreneur, Institution	Required; drives conditional fields
State / province and city	Location and programme matching	Conditional / optional
Department / course / branch	Academic segmentation	Student and faculty
Year / semester / graduation year	Student profile	Student
Years of experience	Expertise and assignment matching	Faculty, industry, expert, consultant
Short professional bio	Profile summary	Optional
LinkedIn / professional URL	Professional identity	Optional
Profile photograph	Member profile and digital card	Optional
CV / credentials	Expert verification	Expert / trainer / consultant only
Preferred delivery mode	Online, offline, hybrid	Expert / trainer
Areas of interest	Opportunities and recommendations	Optional multi-select
Communication preferences	Email, SMS, WhatsApp, app notifications	Consent-based

4.3 Qualification dropdown

SSLC / 10th; PUC / 12th; ITI; Diploma; Undergraduate degree; Postgraduate degree; MBA / MCA; M.Tech / M.E.; M.Sc.; M.Phil.; Ph.D.; Postdoctoral; Professional qualification; Other.

4.4 Domain expertise taxonomy

Category	Example selectable skills / expertise
Management	HR, leadership, marketing, finance, operations, strategy
Project management	Scrum, Agile, Jira, PMP preparation, CAPM preparation, MS Project, Primavera P6, Kanban
Data analytics	Power BI, Excel, Tableau, SQL, Python, R, Looker Studio
Artificial intelligence	Generative AI, prompt engineering, AI agents, Copilot, Gemini, workflow automation
Software / IT	C, C++, Java, JavaScript, React, Node.js, Git, Docker, cloud
Engineering	AutoCAD, SolidWorks, CATIA, Creo, ANSYS, MATLAB, Siemens NX, Revit
IPR	Patent search, patent drafting support, trademarks, copyright, designs
Education	FDP, teaching, curriculum, OBE, accreditation awareness
Digital marketing	SEO, Google Ads, Meta Ads, analytics, content marketing
Corporate	HR analytics, Six Sigma, Lean, Kaizen, OKR, performance management
Entrepreneurship	Business model, startup development, market analysis, pitch deck
Wellbeing	Workplace culture, employee engagement, happiness measurement, organisational climate

4.5 Conditional registration forms

Category	Additional fields
Student	College / university, course, branch, current year / semester, expected graduation year, student ID optional
Faculty	Institution, department, designation, highest qualification, years of teaching experience, subjects handled
Industry	Company name, sector, designation / role, company website, organisation size optional, business contact
Expert / trainer	CV, qualifications, expertise, years of experience, training topics, languages, online/offline availability, fee expectation, portfolio optional
Consultant	Consulting domain, service description, experience, credentials, availability, fee model
Entrepreneur	Venture / business name, sector, stage, website, support interests and contact details
Institution	Legal / official institution name, type, address, website, authorised contact, official email, collaboration interests

4.6 Registration workflow

- User selects membership category and accepts the privacy notice.
- User enters required details and submits the form.
- System validates fields and verifies email and mobile number.
- System creates a unique member record and member ID.
- General member account becomes Active after verification or configured review.
- Expert / trainer / consultant profile enters a separate credential-verification queue.
- System sends confirmation and login instructions.
- Member can edit permitted profile fields and manage communication preferences.

4.7 Membership IDs

Category	Suggested ID pattern	Example
Student	AET-STU-######	AET-STU-000001
Faculty	AET-FAC-######	AET-FAC-000001
Industry	AET-IND-######	AET-IND-000001
Expert	AET-EXP-######	AET-EXP-000001
Trainer	AET-TRN-######	AET-TRN-000001
Institution	AET-INS-######	AET-INS-000001
Consultant	AET-CON-######	AET-CON-000001

IDs must be generated server-side, unique, immutable and never reused. Do not expose database primary keys in public URLs.

4.8 Digital membership card

Display Aethrivo logo, member name, category, membership ID, issue date, status and optional QR code that resolves to a minimal public verification page. Do not expose date of birth, phone, email or private profile data through the QR code.

5. SEVEN BUSINESS VERTICALS – FUNCTIONAL REQUIREMENTS

5.1 Vertical 01 – Aethrivo IPR

Positioning: Intellectual property, innovation and commercialisation services.

- Service catalogue: patent search / prior-art analysis, patentability assessment, drafting assistance, filing coordination, prosecution support, design registration, trademark and copyright assistance, patent landscaping, IP portfolio support and IPR training.
- Enquiry form: applicant type, invention / service category, short description, preferred consultation, contact details and secure document upload.
- Workflow: New → Initial Review → Clarification Required → Quotation Sent → Client Approval → In Progress → Client Review → Completed / Closed.
- Features: confidential upload, assigned professional, internal notes, quotation, milestone tracking, secure messages and downloadable deliverables.
- Admin: service categories, fee quotation, professional allocation, document permissions and case status.

Guardrail: Clearly state the distinction between consultancy / drafting assistance and regulated representation. Patent-agent activities must be handled by appropriately registered professionals where required. No guarantee of grant or registration.

5.2 Vertical 02 – Aethrivo Academy

- Programme catalogue: FDP, SDP, MDP, EDP, leadership, train-the-trainer, communication, personality development, OBE, innovation and entrepreneurship.
- Programme page: title, outcomes, audience, prerequisites, trainer, duration, dates, mode, fee, seats, agenda and cancellation terms.
- Registration: participant details, payment if paid, confirmation, joining instructions and calendar entry.
- Delivery: online meeting link or offline venue; attendance, feedback, assessment and certificate.
- Admin: batch creation, trainer assignment, participant list, attendance, certificate templates and financial summary.

5.3 Vertical 03 – Aethrivo Skills

The Skills module must be a searchable course catalogue with categories, filters and course detail pages.

Course category	Initial tool / subject catalogue
Project management	Scrum Master preparation, Agile, Jira, Trello, MS Project, Primavera P6, Kanban, PMP / CAPM preparation
Data analytics	Power BI, Advanced Excel, VBA, Tableau, SQL, Python, R, Minitab, Looker Studio, Power Query
AI & automation	ChatGPT, Copilot, Gemini, Claude, prompt engineering, AI agents, n8n, Zapier, Make.com, AI productivity
Software development	C, C++, Java, Python, JavaScript, React, Node.js, HTML/CSS, Git/GitHub, Docker, Kubernetes, Linux
Cloud	AWS, Microsoft Azure, Google Cloud

Course category	Initial tool / subject catalogue
Engineering	AutoCAD, SolidWorks, CATIA, Creo, Fusion, ANSYS, MATLAB, Simulink, Siemens NX, Mastercam, Revit, STAAD.Pro, ETABS
Digital marketing	Google Ads, GA4, Search Console, SEO, SEMrush, Ahrefs, Meta Ads, Canva, WordPress, Shopify, Mailchimp
HR & management	HR analytics, people analytics, DISC awareness, Six Sigma, Lean, Kaizen, OKR, Balanced Scorecard, emotional intelligence
Finance & ERP	TallyPrime, SAP FICO, MM, PP, SD, Oracle ERP, QuickBooks, Zoho Books, financial modelling

Course detail and learning functions

- Course title, category, level, language, delivery mode, duration, fee, prerequisites and outcomes.
- Trainer profile, syllabus, module list, timetable, sample lesson and support contact.
- Enrolment, payment, invoice, cancellation / refund terms and learner dashboard.
- Learning materials, live-session links, assignment submission, quizzes and feedback.
- Attendance and assessment rules; certificate eligibility criteria shown before enrolment.
- Certificate ID and verification page for certificates issued by Aethrivo.
- External certification preparation must be distinguished from official third-party certification. Use authorised partner status only when documented.

Suggested initial flagship courses

Power BI Professional; Advanced Excel; Scrum Master Preparation; Jira Project Management; AI Tools for Professionals; Prompt Engineering; Python for Data Analytics; Six Sigma Green Belt; AutoCAD; SolidWorks; ANSYS; Primavera P6; Digital Marketing; Power Automate; SQL; HR Analytics; Financial Modelling; Business Model Canvas and Startup Development.

5.4 Vertical 04 – Aethrivo Corporate

- Services: corporate training, leadership development, team building, HR consulting, employee engagement, culture assessment, performance management, business process improvement, Lean / Six Sigma, strategic planning, innovation and productivity consulting.
- Corporate enquiry: organisation, sector, headcount band, locations, challenge, desired outcome, participants, delivery mode, preferred dates and budget range optional.
- Features: request proposal, discovery call, proposal versioning, contract / work order record, delivery schedule, attendance, feedback and project closure.
- Support one-time engagements and recurring retainer contracts.

5.5 Vertical 05 – Aethrivo Talent

- Expert directory with search by subject, tool, qualification, sector, language, location and online / offline availability.
- Expert onboarding: CV, qualification, experience, expertise tags, training topics, languages, fee expectation, availability and consent.
- Verification: Submitted → Under Review → Verified / More Information Required / Rejected / Suspended.
- Assignment workflow: Client Requirement → Matching → Shortlist → Expert Confirmation → Quote → Booking → Delivery → Feedback → Payment.
- Keep public directory visibility opt-in. Do not display private contact details or documents without explicit permission.
- Commission, cancellation, replacement and payout policies must be visible to participating experts and clients.

5.6 Vertical 06 – Aethrivo Wellbeing

Products: Organisational Happiness Index (OHI), Organisational Toxicity Index (OTI), Faculty Happiness Index, Student Happiness Index, Employee Happiness Index, Leadership Effectiveness, Employee Engagement and Institutional Culture assessments.

Possible OHI dimensions: job / study satisfaction, leadership support, recognition, relationships, work-life balance, psychological safety, growth, engagement, belonging and communication.

Possible OTI dimensions: reported bullying, unfair treatment, favouritism, intimidation, excessive workload, lack of transparency, blame culture, communication breakdown and psychological insecurity.

- Workflow: Organisation contract → assessment design → privacy notice and consent → survey invitation → anonymous response collection → quality checks → aggregate analysis → report → intervention recommendations → follow-up measurement.
- Provide separate scores; a high happiness score must not automatically cancel or conceal a high toxicity score.

- Use established instruments only under their applicable licence / permissions. Develop proprietary scales through expert review, pilot testing, reliability and validity analysis, and representative norming.
- Suppress small groups and potentially identifying breakdowns. Do not identify or label individual employees as toxic. Do not present the tool as a clinical diagnosis.

5.7 Vertical 07 – Aethrivo MoU & Collaborations

- Partner types: colleges, universities, international universities, industries, MSMEs, incubators, startups, training providers, technology firms, publishers and professional associations.
- Services: partner identification, collaboration opportunity mapping, MoU drafting coordination, scope and activity planning, implementation support, activity evidence, review and renewal tracking.
- MoU request form: organisation, authorised contact, partner type, proposed collaboration areas, expected outcomes, geography, proposed duration, financial expectations and supporting documents.
- MoU repository: agreement title, parties, signatory roles, start / end dates, renewal notice, scope, owner, confidentiality level and status.
- Activity tracker: activity under MoU, date, participants, responsible coordinator, outputs, evidence documents, cost / funding source and follow-up.
- Status: Lead → Discussion → Drafting → Legal / Institutional Review → Approved → Signed → Active → Under Review → Renewed / Expired / Terminated.
- Do not represent an unsigned draft as an executed MoU. Access to signed agreements must be restricted.

6. MEMBER DASHBOARDS & USER JOURNEYS

6.1 Student dashboard

- Profile and membership card; selected interests and expertise.
- Enrolled courses, learning progress, assignments and certificates.
- Upcoming programmes, registrations and attendance.
- Internship / project / opportunity listings and saved opportunities.
- Service enquiries and support tickets.
- Notification and privacy preferences.

6.2 Faculty dashboard

- Academic profile, department and expertise.
- Trainer / resource-person interest and verification status.
- FDP / SDP opportunities and assignment history.
- Professional collaboration and consultancy enquiries.
- Courses, programmes, certificates and saved opportunities.

6.3 Industry dashboard

- Company / organisation profile and authorised contacts.
- Request training, corporate consulting, IPR and wellbeing assessment.
- Submit MoU / partnership proposals.
- Track quotations, proposals, projects and programme registrations.
- View invoices and payment status for authorised organisation users.

6.4 Expert / trainer dashboard

- Profile and credentials; verification state.
- Expertise tags, fee expectation, availability and delivery preferences.
- Assignment invitations, accept / decline, schedule and deliverables.
- Payment / payout statement and tax documents where applicable.
- Feedback and profile visibility settings.

6.5 Institution dashboard

- Institution profile and authorised representatives.
- Training requests, MoU records and activity calendar.
- Programme participation and service projects.
- Reports and documents shared with that institution.
- Renewal reminders and collaboration status.

6.6 Core user journeys

Journey	Successful outcome
Visitor → Member	Verified free account and unique membership ID
Member → Learner	Course discovery, enrolment, payment if applicable and learning access
Member → Expert	Credential submission, verification and expert profile
Institution → Training client	Requirement, proposal, agreement, delivery and feedback
Organisation → Wellbeing client	Consent-based assessment, aggregate report and action plan
Institution → MoU partner	Proposal, review, signed agreement, activity tracking and renewal
Client → IPR customer	Confidential enquiry, scope, quote, service delivery and closure

7. ADMINISTRATION, OPERATIONS & CRM

7.1 Admin dashboard

Module	Admin capabilities
Overview	Member count, active users, enquiries, enrolments, revenue, upcoming programmes and pending tasks
Membership	Search, filter, approve, suspend, export permitted data, manage categories and duplicates
Expert verification	Credential review, verification notes, approval, expiry / re-verification
Vertical management	Configure service categories, pages, pricing display, coordinators and workflows
CRM	Lead capture, source, owner, priority, stage, next action, notes and follow-up
Courses	Create course, modules, batches, trainers, fees, enrolment, attendance and certificates
Programmes	Create programme, registrations, participants, attendance and certificates
IPR cases	Assign case owner, control documents, milestones, quotations and status
Corporate projects	Proposals, contracts, delivery milestones, client feedback and renewals
MoUs	Partner records, agreements, activity log, expiry and renewal
Wellbeing	Assessment configuration, anonymised response access, aggregate reports and access audit
Payments	Orders, invoices, payment status, refunds, reconciliation and payout records
Content / CMS	Edit pages, banners, FAQs, blogs, notices and SEO metadata
Reports	Operational, membership, finance, course, programme and vertical-wise reports
Settings	Roles, permissions, categories, templates, integrations and audit logs

7.2 CRM lead stages

New → Contacted → Requirement Clarification → Qualified → Proposal / Quotation Sent → Negotiation → Won / Service Started → Completed → Lost / Closed. Each lead must have an owner, source, next action and timestamp.

7.3 Internal task and SLA controls

Allow configurable response targets for new enquiries, expert verification, quotation preparation, support requests and payment reconciliation. Show overdue items to the responsible coordinator and administrator.

8. PAYMENTS, PRICING & REVENUE WORKFLOWS

8.1 Free and paid boundary

Free: General student, faculty and industry membership, member ID and agreed basic community functions. Paid: courses, premium workshops, institutional programmes, consultancy, wellbeing assessments, corporate contracts, expert services and other clearly described deliverables.

8.2 Indicative launch pricing – subject to approval

Service	Indicative price
Introductory webinar / orientation	Free
One-day workshop	■299–■999 per participant
Three-day workshop	■999–■1,999
Two-week professional course	■1,999–■3,999
Six-week advanced programme	■4,999–■9,999
Institutional FDP	■15,000–■50,000
Institutional SDP	■20,000–■75,000
Corporate training	■25,000–■1,00,000+; scope-based
Wellbeing assessment	■15,000–■1,50,000+; sample and scope-based

8.3 Payment requirements

- Integrate a reputable payment gateway after legal entity, bank and KYC readiness.
- Support order creation, payment confirmation through signed webhook, invoice / receipt, refund status and reconciliation.
- Never mark an order paid based only on a browser redirect; verify payment server-side.
- Store gateway transaction references, not card numbers or CVV.
- Display taxes, applicable fees, cancellation and refund terms before checkout.
- Support manual bank-transfer reconciliation for institutional purchase orders if approved.
- Keep expert payout ledger separate from customer collections and platform revenue.

8.4 Illustrative expert payment model

For a sample institutional training invoice of ■40,000: trainer ■12,000; travel / logistics ■3,000; operations / marketing ■2,000; contribution before general overheads and tax ■23,000. This is an example only; each assignment requires an approved quotation and contract.

9. NOTIFICATIONS, COMMUNICATION & INTEGRATIONS

Trigger	Channel / action
Registration submitted	Email confirmation; OTP / verification
Membership activated	Email and dashboard notification with member ID
Expert verification update	Email and dashboard notification
Course enrolment / payment	Receipt, enrolment confirmation and joining details
Upcoming programme	Reminder based on configurable schedule
Assignment invitation	Email / dashboard; accept or decline
New service enquiry	CRM task to assigned coordinator
Quotation / proposal	Secure link or authenticated dashboard
MoU renewal due	Reminder to authorised owner
Programme change	Email and push notification; SMS / WhatsApp only with appropriate consent
Password / security event	Security notification

9.1 Integrations to consider

- Email service provider for transactional and bulk communication, with unsubscribe controls for marketing.
- SMS / OTP provider and optional WhatsApp Business integration, subject to consent and provider rules.
- Payment gateway for online fees.
- Video meeting tools such as Zoom or Google Meet.
- Calendar integration for programme schedules.
- Cloud file storage with private access and expiring download links.
- Analytics and error monitoring.
- Optional LMS integration such as Moodle, or a custom learning module.

10. TECHNICAL ARCHITECTURE & NON-FUNCTIONAL REQUIREMENTS

Layer	Suggested option	Notes
Frontend website	Next.js / React	Responsive, SEO-friendly public pages and member portal
Mobile app	Flutter or React Native	Build after shared backend and MVP validation
Backend	Node.js / NestJS or equivalent	Modular API and workflow services
Database	PostgreSQL	Relational data, transactions and reporting
Authentication	Secure managed auth or robust custom implementation	Email / mobile verification, MFA for privileged users
File storage	Private object storage	Encryption, access control and malware scanning
Payments	Razorpay or suitable provider	Select based on Indian and international requirements
LMS	Moodle integration or custom module	Do not duplicate mature LMS functionality unnecessarily
Hosting	Reputable cloud provider	India / international data considerations to be reviewed
Analytics	Product analytics and BI	Consent-aware and privacy-minimised

10.1 Architecture principles

- Use a modular monolith initially or clearly separated services only where scale requires it.
- Maintain one source of truth for users, memberships, organisations, courses, orders and service cases.
- Use documented REST / API contracts and versioning.
- Separate public profile fields from private account data.
- Use environment-specific configuration and secrets management.
- Maintain staging, production and backup environments.
- Implement automated tests, deployment pipeline, monitoring and rollback.

10.2 Performance, availability and usability

- Mobile-first responsive design; key pages usable on common Android and iOS browsers.
- Optimise images, scripts and page loading; target Core Web Vitals within recommended ranges.
- Paginate and search large member / expert directories.
- Support reasonable concurrent traffic and load testing before campaigns.
- Provide graceful error messages and retry-safe payment / form submissions.
- Plan backups, disaster recovery, uptime monitoring and incident response.

11. PRIVACY, SECURITY, LEGAL & ETHICAL SAFEGUARDS

- Publish privacy notice, terms of use, cookie notice, refund / cancellation policy and grievance contact before launch.
- Obtain clear consent for data collection, public expert directory visibility, marketing communication and sensitive assessment participation.
- Collect only fields necessary for a stated purpose. Date of birth and nationality should be optional unless justified.
- Provide processes for access, correction, deletion and withdrawal of consent as applicable under Indian law and other relevant jurisdictions.
- Use encryption in transit and at rest, secure password hashing, MFA for admins, least-privilege access and audit logs.
- Rate-limit login and OTP, protect against common web vulnerabilities, scan uploads and test backups.
- Restrict access to invention disclosures, contracts, signed MoUs and wellbeing responses.
- Use data processing agreements with hosting, payment, messaging and analytics providers where required.
- Set retention periods and secure deletion / anonymisation processes.
- Review compliance with applicable Indian data protection law, consumer protection, GST, intellectual property, employment and cross-border data requirements with qualified professionals.

Wellbeing data safeguard: Survey participation must be voluntary and confidential. Use anonymous or pseudonymous collection where feasible, aggregate reports, small-cell suppression and a clear no-retaliation principle. Do not provide identifiable individual responses to employers unless there is a specific lawful basis, transparent notice and appropriate safeguards.

12. REPORTING, ANALYTICS & KPIs

Area	Suggested measures
Membership	Registrations by category, verified accounts, active members, growth, completion and retention
Engagement	Monthly active users, logins, course views, programme participation and opportunity interactions
Talent	Experts registered, verification turnaround, assignment acceptance, delivery and feedback
Academy / Skills	Enrolments, completion, attendance, assessment outcomes, certificates and repeat learners
IPR	Enquiries, qualified leads, quotations, active cases, completion time and customer feedback
Corporate	Proposals, conversion rate, project value, repeat contracts and satisfaction
Wellbeing	Response rate, domain scores, report delivery and follow-up completion; aggregate only
MoU	Partners, signed active MoUs, activities delivered, evidence completion, renewals and outcomes
Finance	Revenue by vertical, direct delivery cost, contribution, refunds, receivables and cash flow

Dashboards must distinguish registered members from active members, enquiries from paying customers, invoiced revenue from collected revenue, and signed MoUs from active collaborations.

13. MVP ROADMAP & IMPLEMENTATION PRIORITIES

Phase	Timeline guide	Build scope	Release gate
0 – Discovery	1–2 weeks	Confirm legal identity, brand, forms, workflows, pricing, content, privacy and technical choices	Signed requirements and approved wireframes
1 – MVP	6–10 weeks	Public website, free membership, OTP, member ID, profile, basic dashboards, seven vertical pages, enquiry CRM, basic courses/programmes and MoU enquiry	Functional testing, security review and owner UAT
2 – Commercial operations	4–8 weeks after MVP	Payment, invoices, LMS, certificates, expert verification, service case tracking, institutional accounts, MoU register and reporting	Successful pilot with real customers
3 – Advanced platform	After validation	Mobile apps, expert marketplace, assignment matching, payouts, wellbeing survey engine and advanced analytics; international features	Scale, privacy and operational readiness

13.1 Recommended MVP priority

Launch a responsive website and robust backend first. The first release should include free membership, category-specific profiles, seven service verticals, enquiry management, course/programme catalogue, basic expert registration and MoU partnership enquiry. Avoid spending heavily on a complex mobile app or automated marketplace before validating demand.

13.2 Initial content required from Aethrivo owner

- Approved logo, colours, fonts and brand guidelines.
- Founder / leadership biographies and approved photographs.
- Legal company name, registered address, official email and phone after registration.
- Final membership categories and form fields.
- Approved list of services, course titles, prices and refund rules.
- Expert verification policy and service delivery terms.
- Privacy notice, terms, consent text and grievance contact.
- Sample certificate, quotation, invoice and proposal templates.
- Approved partner logos and testimonials with permission.

14. ACCEPTANCE CRITERIA & DEVELOPER HAND-OFF

14.1 MVP acceptance criteria

- A visitor can view all public pages and all seven verticals on desktop and mobile.
- A visitor can register free under the approved membership categories.
- Email and mobile verification works; duplicate accounts are handled safely.
- Each approved account receives a unique membership ID and can access its dashboard.
- Conditional form fields appear for the selected member category.
- Users can update permitted profile details and privacy preferences.
- Expert / trainer profiles enter a separate verification workflow.
- Service enquiries create CRM records with owner, status, timestamps and history.
- Courses and programmes can be published and users can register.
- MoU enquiries can be submitted and tracked by authorised administrators.
- Admin roles and permissions prevent unauthorised access.
- All forms validate inputs and show clear success / error messages.

- Audit logs record privileged actions; backups and restore procedure are tested.
- Privacy, terms, refund and consent pages are available before public launch.

14.2 Test scenarios

Test	Expected result
Register a student	Free account, verified contact and student ID created
Register faculty + expert interest	Faculty profile created; expert verification remains separate
Submit invalid email / phone	Validation error; no invalid active account
Submit duplicate email	Safe duplicate handling; no second conflicting identity
Upload CV as expert	Private upload stored; only authorised reviewers can access
Submit IPR enquiry	CRM case created; confidential document access restricted
Enrol in paid course	Order created; access granted only after server-verified payment
Cancel / refund request	Request recorded and handled under published policy
Submit MoU proposal	Partner lead created with status and owner
View wellbeing report	Only authorised aggregate results displayed; small groups suppressed
Admin permission test	User cannot access modules outside assigned role
Delete / correct account data request	Request is logged and processed under applicable policy

14.3 Deliverables required from website development agency

- Discovery report, sitemap and approved user journeys.
- UI/UX wireframes and high-fidelity designs for desktop and mobile.
- Technical architecture and database schema.
- Source code repository and deployment documentation.
- Working staging and production environments.
- Admin and member user manuals.
- API documentation and integration details.
- Test plan, test results and security assessment.
- Backup / restore and incident response documentation.
- Training for Aethrivo administrators.
- Source-code, domain, cloud and third-party account ownership / access handover.
- Warranty, maintenance, support SLA and change-request process.

APPENDIX A – MEMBERSHIP FORM FIELD DICTIONARY

Field key	Label	Data type	Validation / notes
full_name	Full Name	Text	Required; reasonable length; trim whitespace
date_of_birth	Date of Birth	Date	Optional unless eligibility requires it; no future date
highest_qualification	Highest Qualification	Dropdown	Required; include Other
email	Email ID	Email	Required; verify; unique account identifier
designation	Designation	Text / dropdown	Conditional by member category
organisation	Organisation / Institution	Text / lookup	Conditional; allow independent / not applicable
phone	Phone Number	International phone	Required; country code; verify
expertise	Domain Expertise	Multi-select + Other	Required; configurable taxonomy
country	Country	Searchable dropdown	Required
nationality	Citizenship / Nationality	Dropdown	Optional; separate from residence
membership_category	Membership Category	Dropdown	Required; controls conditional fields
state_city	State / City	Text / lookup	Optional or conditional
bio	Professional Bio	Long text	Optional; character limit
linkedin_url	LinkedIn Profile	URL	Optional; validate URL
photo	Profile Photograph	File	Optional; file type / size restrictions
consent_terms	Terms Acceptance	Boolean + timestamp	Required
consent_privacy	Privacy Notice Acknowledgement	Boolean + timestamp	Required
consent_directory	Public Directory Opt-in	Boolean + timestamp	Optional; default off
consent_marketing	Marketing Communication Opt-in	Boolean + timestamp	Optional; separate from essential messages

APPENDIX B – COURSE CATALOGUE STARTER LIST

No.	Course	Category
1	Power BI Professional	Data analytics
2	Advanced Excel & Dashboards	Data analytics
3	Scrum Master Preparation	Project management
4	Jira for Project Teams	Project management
5	AI Tools for Professionals	AI
6	Prompt Engineering	AI
7	Python for Data Analytics	Data analytics / IT
8	Six Sigma Green Belt Preparation	Quality / operations
9	AutoCAD	Engineering
10	SolidWorks	Engineering
11	ANSYS Fundamentals	Engineering
12	Primavera P6	Project management / construction
13	Digital Marketing	Business
14	Power Automate	Automation
15	SQL and Database Analytics	IT / data
16	HR Analytics	HR
17	Financial Modelling	Finance
18	Business Model Canvas & Startup Development	Entrepreneurship

APPENDIX C – OPEN DECISIONS TO CONFIRM BEFORE DEVELOPMENT

Decision	Recommended starting point
Legal entity and final registered name	Confirm after company-name and legal review
Domain name	Check availability and secure chosen domain
Brand identity	Approve logo, colours, typography and usage rules
Membership categories	Student, Faculty, Industry, Expert, Trainer, Consultant, Entrepreneur, Institution; confirm final list
DOB and nationality	Optional unless a clear use case requires them
Public expert directory	Opt-in only; verified badge only after credential review
Pricing and refunds	Approve per vertical before enabling checkout
Certificate policy	Define Aethrivo-issued certificates and third-party certification distinctions
Wellbeing instrument	Approve methodology, validation, licensing and data governance before launch
MoU service scope	Confirm whether Aethrivo offers facilitation, drafting coordination, implementation or all three
International rollout	Confirm first target countries, payment and data requirements
Mobile app	Build after website MVP and user validation

FINAL PRODUCT DIRECTION

Aethrivo should be developed as one integrated platform, not seven disconnected websites. Shared membership, CRM, payment, content, expert, course and reporting foundations should support all seven verticals. This keeps the user experience consistent and makes the platform easier to maintain and expand.

The first professional release should prioritise a secure free-membership portal, seven clear service verticals, enquiry and CRM workflows, expert registration, course/programme catalogue and MoU partnership enquiry. Advanced marketplace, mobile apps and wellbeing analytics should follow after operational validation.

Final legal text, commercial terms, exact pricing, brand assets and field-level choices remain subject to approval by Aethrivo's owner before production deployment.
